Communities at risk

Ranked by risk score, 0–100

#	Community	Score	People
1	**Community B** Fire 3 km away, wind toward town	86 Extreme	4,800
2	**Community A** Fire 9 km away, smoke	71 High	12,400
3	**Community D** No hospital within 50 km	58 Moderate	2,100
4	**Community C** Smoke advisory, large population	44 Moderate	26,900
5	**Community E** River at 92nd percentile	31 Low	900
6	**Community F** Outside hazard areas	18 Low	7,300

Score = 45% hazard · 20% people · 20% vulnerability · 15% history

AI situation briefing · Day 3, 14:00

Generated from scored data only

- Fire K-2041 grew about 60% since Day 2 and is spreading northeast with the wind. Community B (4,800 people) is now 3 km from the fire edge.
- Community A moved to High because of smoke and a closing fire front. A smoke advisory also covers Community C.
- Recommended now: open the reception centre in Community C, and alert care homes in Community B to prepare to move residents.

What is happening

Wildfire K-2041 is out of control at 4,200 ha, up about 60% since Day 2. Winds from the southwest at 25 km/h are pushing it northeast. An air quality statement for smoke covers the area downwind, and the river near Community E is at its 92nd percentile for this date. CWFIS ECCC GeoMet Water Survey

Who is at risk

Community	Score	People	Main driver
Community B	86	4,800	Fire 3 km away, downwind
Community A	71	12,400	Fire 9 km away, smoke
Community D	58	2,100	No hospital within 50 km, 24% aged 65+

Statistics Canada ODHF (2020)

What changed since Day 2

- Community B rose from High (64) to Extreme (86) as the fire front closed from 8 km to 3 km.
- Community A entered the High band because of the new smoke advisory.
- People in communities above the threshold rose from 4,800 to 17,200.

Recommended preparedness actions

- [ ] **Open the reception centre at the Community C arena** (1,200 spaces).
  Why: estimated shelter need of 3,440 is above current capacity.
- [ ] **Alert care homes in Community B** to prepare residents for possible relocation.
  Why: score 86, with the fire downwind and closing.
- [ ] **Pre-position medical support in Community D.**
  Why: no hospital within 50 km and an older population.
- [ ] **Find 1,640 more shelter spaces** outside the smoke area.
  Why: the shelter gap shown on the Situation screen.

Data gaps

Shelter capacities are simulated. Facility data dates from 2020. Fire perimeters are agency-reported daily, so the 14:00 position is interpolated.

Public advisory draft

EN | FR

For review — not an official alert. A person must approve before release.

Evacuation alert — Community B

A wildfire is 3 km from Community B and moving toward the town with the wind. Be ready to leave on short notice.

What to do now

- Pack essentials: medication, documents, water, phone charger.
- Plan where you will go. A reception centre is open at the Community C arena.
- Check on neighbours who may need help.

Listen to local radio and official channels for an evacuation order.

Français

Alerte d'évacuation — Collectivité B

Un feu de forêt se trouve à 3 km de la collectivité B et se dirige vers la ville avec le vent. Soyez prêts à partir sans délai.

Que faire maintenant

- Préparez l'essentiel : médicaments, documents, eau, chargeur de téléphone.
- Prévoyez où vous irez. Un centre d'accueil est ouvert à l'aréna de la collectivité C.
- Prenez des nouvelles des voisins qui pourraient avoir besoin d'aide.

Écoutez la radio locale et les canaux officiels pour un éventuel ordre d'évacuation.

Projected spread is an illustrative model, not a fire behaviour forecast. Risk scoring, population and facilities are the same as the live system.

Projected fire at +48 h

Baseline · wind from SW, 25 km/h

What-if · wind from W, 40 km/h Simulated

Projected perimeter, +48 h | Perimeter now | Simulated smoke alert

Impact if the wind shifts

Measure at +48 h	Baseline	What-if	Change
Communities above threshold	2	4	+2 (C, D)
People at risk	17,200	46,200	+29,000
Estimated shelter need	3,440	9,240	+5,800
Reception centres still usable	2	1	Community C arena lost
Shelter gap	1,640	8,640	+7,000
Hospitals inside a hazard area	0	1	Community C

Rank changes: Community D 58 → 79 · Community C 44 → 72 · Community B 86 → 74 (fire turns away)

If this happens, act now

AI recommendations from the what-if results

1. **Don't rely on the Community C arena.** Plan a reception centre outside the projected smoke area, such as the Community F school, plus a second site [TO CONFIRM].
2. **Request regional shelter support** for about 8,600 spaces before the shift arrives in 12 hours.
3. **Prepare the Community C hospital** for a possible patient transfer, and identify the receiving hospital.
4. **Pre-alert Community D:** 2,100 people, an older population and no hospital within 50 km.
